TO ENGINEERS, SURVEYORS, STREET AND ROAD CONTRACTORS, PAVIORS, AND BUILDERS.
THE CRAIGLWYD QUARRY COMPANY are now prepared to supply any quantity of square Slabs of various sizes, smooth faced Channel Stones, Kerbs and Building Stones from the Quarries, Penmaenmawr, near Conway, into Trucks at their Siding on the Chester and Holyhead Railway, free on board vessels at the shipping place, or delivered at any safe port by the Company's vessels, at most reasonable prices. This material has been used for many years in Liverpool, Manchester, Chester, Birkenhead, and other large Towns, in Paving the Streets with Sets, and the rough Stones, when broken, in macadamizing. It has been tested in all situations, and found superior to Granite, from its much greater durability, the Sets having been laid down in streets of great traffic upwards of 15 years, with scarcely any perceptible wear. It has been extensively used in Walling and Arching Tunnels, &c. on the Holyhead Line, and much approved by the Engineers.—For prices and further particulars, apply to RAYNES, LUPTON, & CO., Liverpool.
Specimens of the above Stone will be at the Great Exhibition.

E. and H. ROGERSON beg to inform the Inhabitants of their late Father, Mr JOHN ROGERSON, that they intend to discontinue the business carried on at Victoria Wharf, Pimlico, and are SELLING the Stock of STONE and MARBLE at REDUCED PRICES. Yellow Seconds	22s.	6d. "
Pale Seconds	25s.	"
Paviors	45s.	"
Pickings	25s.	"

Marle Place, Half-pressed Bricks, and Place Bricks, at equally low prices. These bricks are sound, well burnt, and extremely free from defects; a very large proportion of the stocks being suitable for external facing. They will be delivered at the above prices any where within two miles of the field.
Apply to HENRY DODD and Co., at the Counting-house, Horton Brickfields, Grange-walk, near the Rosemary Branch, Horton.
N.B. Red Pit Sand, of approved quality, constantly on sale, upon reasonable terms. In the erection of walls, where it is desirable that the work should be kept as free from damp as possible, this sand from its most certainly any saline matter, is acknowledged to be preferable to river sand.

FRENCH PLASTER mixed with sand forms a hard stucco for internal walls, which dries rapidly, and may be used in all cases in place of lime and hair, at a trifling decrease of cost. It is stronger for ranged work than English plaster, and is cheaper in its first cost.—Importers and Manufacturers, J. B. WHITE and SONS, Millbank-street Westminster.

HAIR & HAIR FELT MANUFACTORY, Nechinton-road, Bermondsey.
R. TORRWILL begs to inform builders, engineers, and contractors of hair generally, that he has on hand a large stock of prime WINTER HAIR, suitable for plastering or foundry purposes, which will be delivered in quantities exceeding 3 cwt. free of expense, anywhere in the metropolis and neighbourhood of London. Also, any quantity of IMPROVED PATENT HAIR FELT, to go under slates, or for covering boilers, steam-pipes, &c., to prevent the radiation of heat and deadening sound. In consequence of combining the manufacture of felt with that of hair on the same premises (thereby superseding the necessity of a middle party), he is enabled to render this article at a considerable reduction in price. All communications by letter will be promptly attended to.

ATKINSON'S CEMENT, made in London from the Stone supplied from the Mulgrave estate, is well known for its quick setting properties and fine natural colour, which have distinguished it for many years as the best Cement for Casting and all ornamental purposes.—Manufacturers, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of wood for skirtings, architraves, and panel mouldings, and for in-door flooring, instead of stone. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and beauty of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement, but has the advantage over that material of wholly resisting frost. When used as a stucco, it does not crystallize or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it requires four to five measures of sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, point it out as the finest material for building and embankment walls, the lining of reservoirs, cisterns, and baths, and for all those purposes where strength and a perfect resistance to water are required.
Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 38, Seel-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, Son of the Patentee.—Messrs. ROBINS, ASPDIN, and Co. request reference to Nos. 286, page 451; and also Nos. 294 and 295, pages 543 and 551, of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for upwards of sixty years in the Thames Tunnel to resist the action of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystalize, or turn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from ten to fifty minutes. For all purposes that Cement is applicable, Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland-yard, Whitehall; also at their Depôt, 46, Hanover-street, Liverpool.

PORTLAND CEMENT.—FREEMAN and RICHARDSON have much pleasure in introducing to the trade the above superior CEMENT, being of uniform colour and quality in consequence of never before attained in Portland Cements. It possesses extraordinary cementitious properties, resists the action of frost and heat, and is more durable than any other Cement; does not vegetate, turn green, or crack, combined with which its eminent hydraulic properties stamp it at once as the first Cement of the day for work where all the above qualities are requisite. It is manufactured on the only principle Portland Cement can be, and contrary to the statements put forth by those who have hitherto had the monopoly. Manufactured by RICHARDS, Esq., at his Works, near the River Avon, and sent to all parts of the Kingdom per boat or rail, at a reduced price to the trade.

6, South Wharf, Paddington.
